A Worldwide Commitment to Advance Cities for All

The Global Compact on Inclusive and Accessible Cities is a **declaration** developed in collaboration with the United Nations that aligns key commitments to **accessibility**, **universal design** and **inclusion** within The Sustainable Development Goals, The New Urban Agenda, The Convention on the Rights of Persons with Disabilities and the WHO's Age Friendly Cities Framework.

It affirms the rights of **1 billion persons with disabilities** and the increasing share of the global population aged 60 or older that experience barriers to their equitable participation in society.

Half of all persons with disabilities and older persons around the world now live in towns and cities, and these groups are estimated to number over **2 billion persons in cities worldwide by 2050**.

This global call for action lies at the core of the **#Cities4All campaign**.

Why Join the Compact?
